

Managed Security Services

Stay productive and rest easy knowing your sensitive data is protected— 24/7/365.

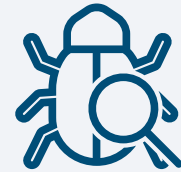

Take a proactive approach in securing your valuable data with GRA Quantum's Managed Security Services (MSS). We combine the best-in-class technology with unmatched human expertise in order to provide advanced 24/7 threat detection and incident response services. Our technology-agnostic approach gives us the flexibility to incorporate into your existing security infrastructure or begin from the ground-up with the technology that is right for your needs.

**24/7 Tailored
Monitoring & Alerting**

Incident Handling

Threat Hunting

The core of our MSS takes place in our Security Operations Center (SOC), where our analysts monitor your sensitive data and provide tailored, actionable alerts. The primary features of our MSS include:

- Managed SIEM
- Alert and Event Monitoring
- Firewall & Intrusion Detection/Intrusion Prevention Monitoring
- Endpoint Solution Monitoring
- Application Log Monitoring
- Mobile Device Management Monitoring
- Email Protection Monitoring
- Network Traffic Analysis and Alerting

GRA Quantum MSS Benefits:

- ✓ Security Staff Augmentation
- ✓ Compliance Readiness
- ✓ Enhanced Visibility into Your Security Posture
- ✓ Improved Productivity and Peace of Mind

Customize Your MSS Solution

When you begin with our core Managed Security Services, you can further customize your MSS solution for additional incident response and remediation or compliance readiness needs.

The following services can be added to your MSS on an à la carte basis:

- Managed SIEM (your in-house solution)
- Firewall Implementation and/or Management
- Endpoint Security Solution Implementation and/or Management
- Mobile Device Management Implementation and/or Administration
- Intrusion Detection System Implementation and/or Management
- Intrusion Protection System Implementation and/or Management
- Email Protection Implementation and/or Management
- Managed Detection & Remediation (MDR) Solutions
- Security Program Policy and Procedure Review or Creation/Management
- File Integrity Protection, Monitoring & Alerting
- Data Loss Prevention, Implementation, Monitoring & Alerting
- Sensitive Data Discovery & Monitoring

Advanced Add-ons

Our Security Operations Center also offers the following capabilities, which can be added to your custom MSS solution or purchased as a stand-alone single service:

Advanced Threat Intelligence

- Brand Monitoring
- Dark Web Monitoring
- Targeted Threat Intelligence
- Website and Email Spoof Monitoring
- Credential Theft Monitoring

Continuous Vulnerability Management

- Continuous Vulnerability Scanning
- Continuous Web Application Scanning
- Vulnerability Reporting
- Vulnerability Prioritization
- Vulnerability Remediation
